

## REMARKS

Claims 1-10 are pending in the application

Claims 4 and 5 are amended for errors in spelling

Claim 8 is amended in order to narrow the scope of the claim. The applicant has further defined the second signal in line 5 of claim 8 as an alternating current signal. The applicant believes that the amended claim is not anticipated by prior patents.

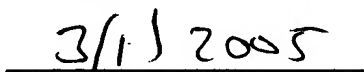

Claim 10 is amended to refer to claim 9 in lieu of claim 8 and the term "said output signal" is replaced by the term "said output" in order to provide antecedent references.

The amendments are respectfully submitted by the applicant for examination

Brian Baskin (applicant)
